XF-702 (DEHA 85%)

Oxygen Scavenger

XF-702(DEHA) is used as an oxygen scavenger to prevent corrosion especially in boiler feed system. It is used as an intermediate for organic synthesis.

Abbreviation	DEHA
Chemical Name	N,N-DIETHYL HYDROXYL-AMINE
Commercial Form	Solution
Molecular formula	(C ₂ H ₅) ₂ NOH
Molecular weight	89.14
CAS NO.	3710-84-7

Typical Properties

Appearance	Clear, colorless to pale yellow liquid
Active Content (%)	≧ 85%
Color(APHA)	≤200
Water	≤15.0%

Packaging

170kg plastic lined iron drum
